Water Level Data Logger Deluxe Kit (100')

Combining high accuracy water level measurements with out-of-the-box convenience, this money-saving kit includes everything needed to start logging right away. It is ideal for monitoring water levels and temperatures in wells, streams, lakes and freshwater wetlands, as well as barometric pressure.

This kit includes:

U20-001-02 HOB0 data logger (100' range) U20-001-04
HOB0 data logger (13' range) for Barometric Pressure U-
DTW-1 HOB0 waterproof shuttle U20-CASE-1 carrying case
BHW-PRO HOB0ware Pro software.

Like other HOB0 Water Level Loggers, the 100-foot version offers exceptional value and ease-of-use, with no cumbersome vent tubes or desiccants to maintain.

Supported Measurements:

Absolute Pressure, Barometric Pressure, Temperature and Water Level

Key Advantages:

- Lightning protection - no long signal wires, and electronics are shielded in stainless steel housing (see the Water Level logger sensor location drawing)
- HOB0ware Pro software provides easy conversion to accurate water level reading, fully compensated for barometric pressure (see demo) temperature, and water density.
- Multiple-rate sampling (see demo) allows faster sampling at critical times such as when pumping starts or stops.
- Available in 4 depth ranges
- Ideal for use in wells, streams, lakes, wetlands and tidal areas
- No-vent-tube design for easy reliable deployment
- Durable ceramic pressure sensor
